

# MARCH CALF PROMO

## FORM-A-CALF RENEW

-Renew is a nutraceutical bolus for young cattle. Product contains high levels of lactic acid producing bacteria, digestive enzymes, essential oils and fungal additives. This product has shown to improve calf performance and number of treatments required during scouring events.

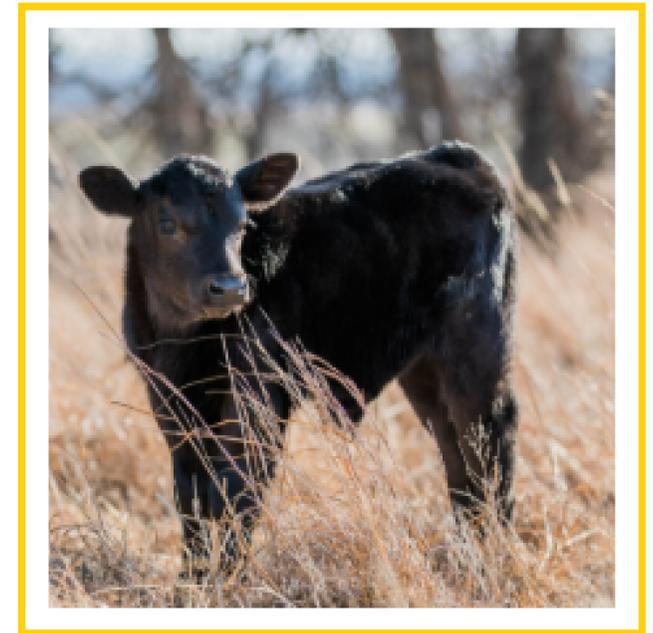

- Easy to administer to young calves
- Improved Performance- increases enzyme activity resulting in improved average daily gain, starter intake and feed efficiency

## FORM-A-CALF ELECTROLYTE

-Electrolyte is soluble granular product for young calves needing replenishment of fluids, electrolytes and energy. In addition to electrolytes and energy, this product provides osmolytes, buffers and fructo-oligosaccharides to accelerate for the recovery process of young calves in need of fluid therapy. The combination of ingredients in this helps maintain body fluids by increasing the speed of absorption and retention of water and electrolytes in the cells.

- Supplies critical nutrients to rehydrate young calves and balance cell fluid levels
- Quick source for calf health and maintenance
- Provides needed electrolytes when calves are scouring, reduces death loss and gets more calves to weaning

## FORM-A-CALF PROBIOTIC BOLUS

-Probiotic bolus is a direct-fed microbial in a bolus capsule form for young cattle. This product contains high levels of lactic acid producing bacteria, live cell yeast, digestive enzymes, and selected vitamins. This has shown the ability to improve calf performance by increasing feed intake, weight gain, and feed conversion and decreasing morbidity.

- Triggers feed intake and lowers feed cost
- Faster gains, earlier calf weaning and heavier calves at weaning time
